

## Cologne Conference Usability Testing Labs

**This year at the CWG Conference in Cologne there will be opportunities for testing yet to be released software from CWG partners. These will all be offered on Day 2 of the conference and registration is required to hold a position. If there is space available you are welcome to attend, but there is a limit to the number of people per session of 3 to 5. All sessions are for solutions that are compatible with SAP.**

**Registration can be found on the brief session descriptions below. Take advantage of these sessions and be better informed and at the same time help influence partner applications.**

**For more information on the guidelines for these testing opportunities, contact the [CWG Program Committee](#)**

---

(All hands-on training and testing is **not sponsored** by CWG, but are opportunities for Conference attendees to offer feedback for solutions or get first hand experience)
